

Water-Repellent Mortar Additive

MORTAR ADDITIVES

PRODUCT OVERVIEW

Powder-and-liquid additive pack for cement mortar and screed. The supplied technical sheet focuses on water repellence, shrinkage control and external plastering applications.

TYPICAL APPLICATIONS

- External plastering and repair mortar
- Cementitious tile beds and selected screed applications
- Moisture-resistant mortar for suitable masonry surfaces

REFERENCE TECHNICAL CHARACTERISTICS

Form:	Two-part pack: liquid plus powder
Typical dosage:	One full sachet for each cement bag up to 50 kg
Mortar guidance:	Mix ratio and curing depend on application
Key effect:	Hydrophobicity (water repellence)
Specific limitation:	Not recommended for ceiling plaster or negative-side use

IMPORTANT SELECTION NOTE

Water repellence is not a universal waterproofing system. Some screed applications still require wet curing. Check full installation requirements.
